

God Coin= Bitcoin Killer

GodCoin

IN THE NAME OF GOD

The GodCoin project is set to take over market dominance by uniting powerful market coins in the form of a coin with a new idea (**MultiCoin**).

GODCOIN:

The solution to the problem of people investing in crypto currency

- It is always a problem for people to invest in crypto currency because they do not know which coin has potential to grow in the medium and long term.

They do not have the majority of knowledge or time to analyze millions of coins, tokens and shit coins using hundreds of technical, fundamental methods and reviewing all the news and events, and they are confused.

And **forced**, Either subscribe to VIP channels monthly recharge fees or pay a separate payment for consulting with others, which is often incorrect and the people are harmed.

And or they have to divide their capital into several coins to reduce the risk .. that many times some of their coins have fallen, some are fixed and some are growing, which in total, if they are lucky.. **Finally**, a small profit to They give.

Unfortunately, many coins are sold to the general public by manipulating the pumps and dump and the volume of false advertisements and tweets of celebrities, which is really worthless and nothing more than a coin this **shit coin**, and after a while they see it fall sharply.

◆ The purpose of the **Godcoin** is to find and buy potential coins that are reasonably priced to pump and grow in the medium term. 💰

The team of **GodCoin**, consisting of the best analysts in the world, which is increasing every day, performs this service and analyzes the market coins every day. 💪

GodCoin team examines the status of coins, a number of them that are at a high and price ceiling, sell and save profits, and new coins are added that are at the best of the price ..

This is always done 24/7 as usual.

We work with any kind of structure on any network **without any bias** in all areas of crypto, including NFT, Metaverse, Gaming, Defi, etc.

 We also monitor the coins that are pre-sold in **IDO, ICO and IEO** exchange offices, and buy a percentage of them at the beginning of entering the market and sell them with great growth and profit.

 Also, coins that are in the beginning of their activity and are in **Decentralized Exchanges** such as pancake and uni sushi swap..., before being listed in the first exchange , we have percentage of them in our basket.

For example, **1 Godcoin consisting of:**

23% Bitcoin, 10% Eth, 5% Dot, 3% Sol, 2% Ada and others....

Simply put, with the purchase of GodCoin, you have a basket consisting of the most potential Coins of the crypto currency world 

 We are aware of the manipulation of exchange to **liquidate positions**, especially long , and we will use the opportunity to see a golden Time to buy at the best of the price.

So we always consider about **20%** of the project capital from the **Stablecoin** , and we place a buy order in the price floor beforehand so that we can catch the best prices with a manipulation of the market or unpredictable negative news, a good average.

 Also, with the knowledge and experience of **Godcoin** analysts, when we see that the whole cryptocurrency market has grown and is at the peak of prices, it has **Up Its Stop Losses** so that we can sell at the price ceiling and save profits.

So even if the market collapses, it has very little effect on the price of the **GODCOIN**.

Because this time the basket is reversed and **80% is about stable coin** and **20% is about Altcoins**.

To start buying coins at a great price by predicting the market.

Our second goal as a trader and analyst is to take over the market domination that is raised and lowered by bitcoin whales, and as a coin that is always made up of the best in the market, regardless of bit fluctuations, any The day becomes stronger and we have independence.

This is what bothers all of us traders and analysts. God willing, **GodCoin has come to end this issue with God's help**.

The remarkable thing is that there are **only 17 millions** of these **Godcoins** and they will **Never be added** .

Of these 17 million , **70%** of the coins (11,900,000) will be **Locked** 2022/1/1.

Therefore, we have reduced the possibility of pumps and dump prices and market manipulation by whales and telegram channels **To ZERO** .

In addition, we will have extraordinary programs for price growth, such as : Token Burning, various types of **Airdrops**, as well as **Stake** or **Earn** in various exchanges .

We are proud of God's Thanks that we can contribute to various charitable works in the world , in addition to each other's benefit .

Of course , it should be noted that no cost will be deducted from you for the following contributions from the commission or commission , but this service is from the benefit of the project and the management account of Godcoin team .

when you buy and invest in Godcoin , unwittingly participate in good deeds and you will definitely receive rewards and positive energy karma .

7 % of the project profit is calculated every month and deposited in a separate wallet to :
Charity and helping the needy Environment ... trees and forestry ... garbage collection ...

Entrepreneurship and job creation Made for school and university University tuition allowance

Water supply to remote areas Help build or renovate sports facilities in various disciplines And

...

As we know , we can not spend a lot of money on advertising and introducing the project at first , so we ask you to introduce this coin among friends on social networks with strength and faith.

In the End, as the founder and project manager , I swear and I promise you , I will fight day and night for Godcoin progress , and God willing surely in the near future you will be rewarded with this trust and investment with growth and profit. 😊

We Humans Are Friends with every religion and from every country in the world and we believe in God , so we ask God to support all of us in this great and global project.

AMIN 🙏
